

September 14, 2017

Dear Colleagues:

It is a great pleasure and honor to welcome you to the 23rd Annual Scientific Meeting of the International Society of Cardiovascular Pharmacotherapy (ISCP), which is scheduled for May 26–27, 2018, at the Ritz-Carlton, Kyoto, Japan.

ISCP was established in Switzerland in 1983. Its mission is to promote and facilitate strategies to improve cardiovascular health by increasing cooperation among cardiovascular physicians and surgeons, pharmacologists, pharmacists, scientists, and medical practitioners. ISCP promotes education, research, and evidence-based clinical management in all areas of cardiovascular pharmacotherapy to prevent cardiovascular diseases and improve treatment outcomes. A future aim is to use this knowledge to create training programs to teach appropriate pharmacological treatment for cardiovascular diseases. ISCP is an international associate member of the World Heart Federation; its ultimate goal is to ensure patient wellbeing worldwide. Global cardiovascular risk management is required in developing and advanced regions to achieve a 25% reduction of premature deaths from cardiovascular disease around the world by 2025 (25 by 25). This will be discussed in the program session. We invite you to join us for scientific exchange on current topics in evidence-based clinical management and eagerly look forward to your active participation in the 2018 Kyoto ISCP meeting. We are certain that you will enjoy the most up-to-date scientific program, entertaining social and cultural events, and the unique atmosphere of historic Kyoto.

Koji Hasegawa, MD, PhD, FACC, FAHA, FAPSC
President-elect of International Society of Cardiovascular Pharmacotherapy (ISCP)
Chair, 23rd Annual Scientific meeting of ISCP 2018 Kyoto
National Hospital Organization, Kyoto Medical Center
